BESPOKE DESIGN PUMPS

Charles Austen pumps offer the ability to design and manufacture bespoke pumps to fit your requirements perfectly. In fact it's our speciality and what sets us apart from the wider one-trick pony market.

With everything from tool making to assembly carried out in house we have total control over every aspect of the process ensuring outstanding quality and product reliability.

Please note - it is important that you ensure the motor specification stated and the range of materials offered in the pump are compatible with the performance, environmental limitations and chemical resistance requirements of the application. For further information or details of our extensive range of pumps, contact our technical sales office who will be pleased to help you select the most suitable pump for your application.
